PROJECTS

Python Web Crawler

2024.03.01 [Python Crawler: VCT Matchse to .ics file](#)

This project is a Python web scraper that extracts Valorant match information from VLR.gg, including event names, match dates, teams, and scores. The collected data is processed, sorted, and converted into an iCal (.ics) file for calendar subscription. After uploading to any Drive, It can be subscribed by any calendar app.

For more projects information, please visit my [person web](#).
